Handout #3: Problem-Solving Techniques

EXERCISE 1

Mark the following statements as true or false:

1. Your goal defines how the problem should be solved, not what needs to be done.
2. It is inadvisable to begin writing a solution before the goal is defined.
3. For any non-trivial problem, there is likely only one solution.
4. Decomposition guarantees an optimal solution.
5. A tree structure is hierarchical in nature.

EXERCISE 2

You're planning to hold a birthday picnic for a child and her friends. Break down the preparation into a tree structure of tasks. The facts are:

- You need to send out the invitations to the parents of the other children.
- Food you'll provide: sandwiches (ham, chicken, and cheese), homemade cake.
- Fresh ingredients (meat and dairy) need to be purchased on the day.
- Other things you need to take: disposable cutlery, blankets, games.
- The park where the picnic is held requires you to reserve a spot.
- All guests will get a goody bag with sweets when they leave.
